OPENING CEREMONY

The opening ceremony of the **Roofs Prague**, **Solar Prague** and **Craft Prague** trade fairs took place on Thursday 9 February, in the Conference Hall of PVA EXPO PRAGUE Letňany.

The opening was attended by exhibitors, journalists and important guests: Chief Director of the Ministry of Industry and Trade **Eduard Muřický**, Director of the State Environmental Fund **Petr Valdman**, Chairman of the Board of the Association of Small and Medium Enterprises and Tradesmen of the Czech Republic **Josef Jaroš**, Director General of the Association of Small and Medium Enterprises and Tradesmen of the Czech Republic **Eva Svobodová**, Chairman of the Industrial Property Office **Josef Kratochvíl**, Technical Director of the Centre of Civil Engineering **Petr Kučera**, guild master of the Guild of Plumbers, Roofers and Carpenters of the Czech Republic **Ivan Dvořák**, for the Guild of Roofers of Slovakia **Milan Palko** and other guests.

The co-organizers of the trade fairs were represented by the managing directors of Střechy Praha s.r.o. **Vladimír Zábranský** and **Vratislav Kroc**, together with the company's director **Jitka Šefránková**, and for the hosts the Vice-Chairman of the Board of Directors and CEO of ABF a.s. **Martin František Přivětivý**.

On behalf of the entire implementation team, they thanked the exhibitors, representatives of all craft guilds and professional societies, and all partners for their active participation and cooperation in the preparation of the fair.

The set of trade fairs Roofs Prague and For Pasiv was officially launched by cutting the red ribbon and a festive toast.

PHOTOVOLTAICS DOMINATED THE SET OF FAIRS

The Roof-Solar-Craft Prague trade fairs attracted over 24,000 visitors from all over the country and abroad to the Letňany Exhibition Centre and provided a comprehensive overview of materials and trends in roof construction and energy savings. Full exhibition halls of exhibitors and visitors, lots of hot news, inspiring lectures, besieged advice centres and excellent atmosphere. Such was the February set of the Roofs Prague, Solar Prague and Craft Prague 2023 trade fairs.

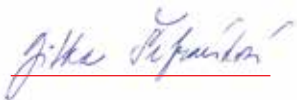

Product innovations from European and international brands were presented by over 150 manufacturers and suppliers from 9 countries. The fair thus once again confirmed its position as the most important field event. Another 150 companies presented themselves at the parallel For Pasiv event in the field of low-energy and passive houses.

The main topic of the fair was the concept of the **roof as an energy source**, as in response to the current situation in society, where the unprecedented rise in energy prices and at the same time, thanks to subsidy incentives, there is a huge demand for photovoltaics and solutions to help mitigate the impact of the energy crisis on households and businesses.

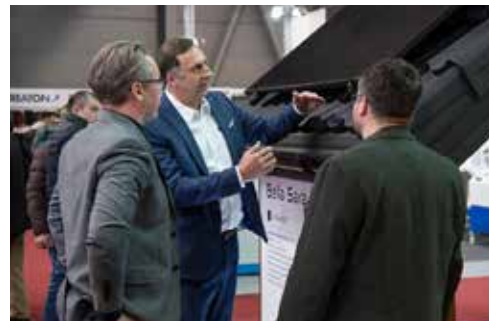

We thank all exhibitors and visitors for their spectacular participation. We would also like to thank all the experts who participated in the preparation of the fair's accompanying program for their excellent cooperation.

We look forward to seeing you again next year at the ROOFS PRAGUE, SOLAR PRAGUE and CRAFT PRAGUE 2024 fairs.

On behalf of the organizer

Ing. Jitka Šefránková
the director of the trade fair

ACCOMPANYING ACTIVITIES

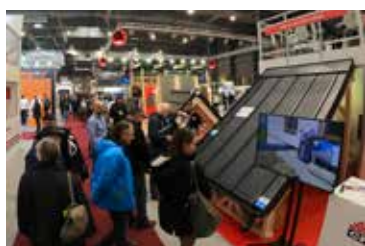

INSULATION CONFERENCE 2023

The hot topic of today was also interwoven with the rich programme of lectures at the 24th annual Insulation Conference, this time with the subtitle "Self-Sufficiency through Roofs". The conference was organised by the long-term partner of the fair, A.W.A.L. The conference hall with a capacity of 150 listeners was completely full. Topics focused on photovoltaics, green roofs and other systems in terms of roof requirements. During the conference, the results of the 12th year of the Antonín Fajkoš Memorial, a competition of student papers dedicated to roofs, were announced.

FORUM PHOTOVOLTAICS OR THE ROOF AS AN ENERGY SOURCE

Also Friday's Forum, which was organized by the Czech Chamber of Authorized Engineers and Technicians, was bursting at the seams, so to speak. The guarantor and moderator of the Forum was Ing. Ladislav Bukovský. Forum focused on the permitting of PV power plants through the lens of the Building Act, the current possibilities of using photovoltaics on building roofs, protection against lightning, overvoltage and fire, safety PV power plant functions and power electronics at panel level, installation of photovoltaic installations from the point of view of the building designer and structural engineer. At the end of the Forum, the requested topic of current subsidy titles was included.

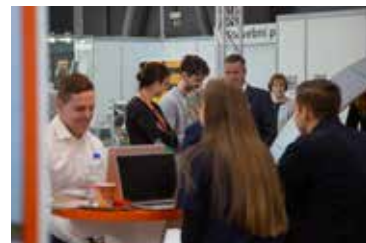

LECTURES AND SEMINARS IN THE OPEN AREA IN HALL 3

Speakers covered topics such as green roofs, digitalisation in the trades, the use of drones in business, roof leak detection and smart energy solutions for family and apartment buildings, cities, municipalities, companies and small tradesmen. Important information, especially for small and medium-sized enterprises, was presented in the lecture block "How to sustain business in 2023". Saturday's block of interesting lectures were prepared by the Guild of Plumbers, Roofers and Carpenters of the Czech Republic.

FREE ADVICE CENTRES UNDER SIEGE

Experts at several advice centres were at maximum capacity. Available to visitors were the traditional Building Consultancy Centre provided by ČKAIT and the Centre for EkoWATT's Renewable Energy and Energy Saving Centre. There was also a counselling centre in the area of modern trends in construction surveying and the use of drones in construction. Recommendations on the implementation company and other valuable advice from practice were obtained by visitors at the stand of the Guild of Plumbers, Roofers and Carpenters of the Czech Republic.

WOOD AND TOOLS FESTIVAL

For the fourth time, the Wood and Tools Festival was part of the fair. Manufacturers and sellers presented themselves tools of world brands, as well as manufacturers of professional plumbing and carpentry machines, suppliers of wooden structures, as well as secondary vocational schools. The advancing process of digitalization of crafts, there was no shortage of software for planning, visualization, prefabrication and other digital technologies, including the use of drones in construction and industry.

The children made extensive use of the rest area full of wooden games. Parents could sit on the stylish wooden chairs and watch inspiring videos on the art of carpentry and other cutting-edge implementations, including a presentation of the world's newest unique transparent roof system Nebesys.

ATTRACTIONS AND COMPETITIONS FOR VISITORS

This year's fair was packed with novelties, practical demonstrations and competitions for valuable prizes.

Visitors to the TONDACH, SATJAM and STŘECHY COMAX stand could win roofing for a family house. At the PREBENA stand, visitors could win a VITAS 100-AKKU including battery and charger and also enter the main draw for a hybrid nailer. AMPLITUDI has prepared a competition for a Xiaomi Scooter Pro 2 electric scooter.

Every day there were competitions in roofing skills. The main prize was a pneumatic stapler from PREBENA, including an ES-BOX case with fasteners directly for gun. In addition, each participant received Mamut Glue from DEN BRAVEN and other interesting prizes.

COMPETITIONS AND AWARDS

PERSONALITY OF THE ROOFING FIELD

Personality of the Roofing Field award, which the organiser of the Roofs Prague fair has been awarding since 2014, went to **Ing. Jakub Nepraš**. The award was presented at a gala evening in the premises of Clarion Hotel.

Mr. Nepraš is an unmissable figure of the roofing field, which is connected with the significant emergence of Bramac after the Velvet Revolution. Mr. Nepraš also initiated the establishment of the Guild of Plumbers, Roofers and Carpenters of the Czech Republic, where he also served as a member of the Board of Directors. His second, no less successful professional stage is connected with the Prefa Aluminiumprodukte brand and the cultivation of the plumbing trade. Great charisma, willingness to help, modesty and fairness. These are the qualities that clearly describe Mr. Nepraš. He also spreads good cheer wherever he goes.

GOLDEN ROOF TILE COMPETITION 2023

For the twenty-first time, the competition for the best exhibits of the fair was held. All registered exhibits were exceptional and the expert jury awarded two Golden Roof Tiles and 4 honorable mentions.

Golden Roof Tile for NEBESYS

Nebesys has introduced the unique Nebesys transparent roof system. The world's first system that is indistinguishable from a conventional roof from the outside, creating a compact transparent surface from the inside. Unique solution combines aluminium templates with thermally insulating glass.

Golden Roof Tile for WIENERBERGER LEADAX ROOF

Wienerberger has introduced a waterproofing membrane for flat and gently sloping roofs, made from PVB waste, so with a minimal ecological footprint.

Honorable mentions for their products went to the following companies:

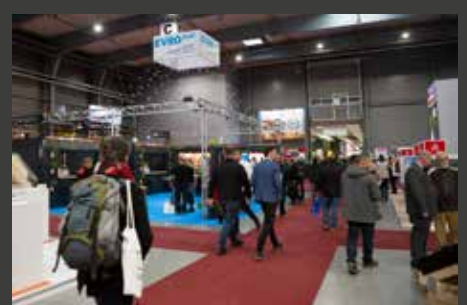

SATJAM for the unique holder for solar systems DSS.CWL.7016, which is safely anchored only to the roofing sheet.

Regra Plast for EUREKO GREEN ROOFING CASE - cassette element for building a sloping green roof.

TOPWET for the TWJ UNI universal roof drain, a reliable drainage solution even in hard-to-reach areas during flat roof renovations.

Střechy 92 Zlín was awarded for the reconstruction of flat roofs of prefabricated houses with the RpSt system.

EXPO DESIGN AWARD 2023

In the competition for the most eye-catching expositions, exhibitors' stands were evaluated in two categories: stands up to 49 m² and stands from 50 m². The jury evaluated and selected from all the stands presented at the Roofs Prague, Solar Prague and Craft Prague trade fairs 2023. The jury was chaired by Ing. arch. Jan Hlavín, Ph.D. from the Faculty of Architecture, Czech Technical University in Prague. The evaluation was focused on the overall appearance, attractiveness, interesting and unconventional solutions, efficiency, clarity and friendliness for visitors.

The EXPO DESIGN AWARD for the most eye-catching expositions went to the following companies:

Exposition up to 49 m²

1st place: **Mounting Systems GmbH**

2nd place: **GREEN DEPOT - Vše pro zelené střechy**

3rd place: **SOMI Applications and Services s.r.o.**

Exposition from 50 m²

1st place: **Betonpres a.s.**

2nd place: **MAFELL AG**

3rd place: **Nebesys a.s.**

CONGRATULATIONS TO ALL WINNERS!

 **STŘECHY** PRAHA  **SOLAR** PRAHA  **ŘEMESLO** PRAHA

WE CORDIALLY INVITE YOU

to the jubilee **25th year** of the **Roofs Prague** trade fair, which will take place again in parallel with the **Solar Prague** and **Craft Prague** trade fairs at the exhibition centre in Prague Letňany.
